Software Development Technologist, focused on full-stack web development and software architecture. Experience as a QA, creating and documenting manual test cases. Passionate about building functional and well-structured solutions.

PROFESSIONAL EXPERIENCE

Rappi S.AS

Quality Assurance Manual

Medellín, Colombia

January 2025– July 2025

- Supported the QA team in the planning, execution, and documentation of manual test cases.
- Used tools like Jira, Zephyr, and Amplitude to track testing efforts and analyze events.
- Participated in agile processes, collaborating closely with developers and fellow QA members.
- Contributed to regression, smoke, and exploratory testing in both development and production environments.
- Continuously improved documentation processes and issue traceability.
